History

#1 - 05/09/2017 07:08 PM - Luke Murphey

```
Install this app into Splunk by doing the following:

  1. Log in to Splunk Web and navigate to "Apps » Manage Apps" via the app dropdown at the top left of Splunk'
s user interface
  2. Click the "install app from file" button
  3. Upload the file by clicking "Choose file" and selecting the app
  4. Click upload
  5. Restart Splunk if a dialog asks you to

Once the app is installed, you can use the app by configuring a new "File Meta-data" input:
  1. Navigate to "Settings » Data Inputs" at the menu at the top of Splunk's user interface.
  2. Click "File Meta-data"
  3. Click "New" to make a new instance of an input
```
