Description			

History

#1 - 10/20/2015 09:07 PM - Luke Murphey

This can be tested by:

Declaring a collections.conf

```
[test]
field.title      = string
field.text       = string
```

Declaring a transforms.conf for the collection

```
[test_lookup]
collection      = test
external_type   = kvstore
fields_list     = _key,title,text
```

Populating the lookup with a search

```
index=_internal | head 5 | eval title=sourcetype | eval text=source | table title text | outputlookup test_loo
kup
```

Verify the lookup is populated with:

```
| inputlookup append=t test_lookup
```
