History

Date-time needs to be formatted as an epoch number.

I'm going to need to pass columns headers in the colHeaders param to get the table to recognize that the header is not to be treated as a boolean. However, this prevents the header from being modifiable (cannot change CSV schema).

#3 - 10/26/2015 08:27 PM - Luke Murphey

Things to do:

1. Re-enable column editing on CSV lookups
2. Remove code to prevent editing first row (since it isn't the header anymore on KV lookups)
3. Make sure that the save works on CSV lookups (since the header isn't in the table)
4. Add sorting support
5. Make sure that the meta-data call gets done before the table has data posted to it

Could modify cell header using a custom renderer: <http://docs.handsontable.com/0.19.0/demo-custom-renderers.html>
