**Description**

I have a slideshow question:
while I have a slideshow running, is there a hot-key and/or a mouse-click
available to instantly advance to the next dashboard in the show?

how hard would this be to implement??
thanks!  Fred Ziegler   fred.ziegler@alum.mit.edu

*- Target version set to 2.3.0*

This isn't too hard. I might add a link in the small dialog that comes down when you hover near the top of the page that allows you to stop the slideshow.

**#2 - 11/16/2015 07:52 PM - Luke Murphey**

There is now. I just released version 2.3 which includes buttons on the overlay controls for going to the next and previous pages. You can also click left and right on the keyboard to go to the previous and next pages respectively.
