This requires updating Whoosh to add the sortable analyzer. Updating Whoosh to 2.7.2 (<https://bitbucket.org/mchaput/whoosh/downloads>) loses the use of the Variations class.

My version of the class returns the variations via the `_words` (<https://github.com/dokipen/whoosh/blob/trunk/src/whoosh/query.py>). This is no longer used.

`_btext` might be equivalent though:
