<b>Description</b>			
Need to strip diacritics in order to do highlighting of words when the highlights don't include diacritics (which is common with searches for words without diacritical marks). See defaultDiacriticsRemovalMap for an option ( <a href="http://stackoverflow.com/questions/990904/remove-accent-diacritics-in-a-string-in-javascript">http://stackoverflow.com/questions/990904/remove-accent-diacritics-in-a-string-in-javascript</a> ).
