The word match counts are not being returned correctly.

This works:

```
work:new-testament section:"Matthew" no_diacritics:υου
```

But searching with the ignore_diacritics option doesn't.

I'm getting 0 matched terms from whoosh when I do a search for no_diacritics.

#5 - 03/19/2016 03:25 AM - Luke Murphey

A search against the no_diacritics field specifically results in the following war search:

```
(work:<new-testament> AND section:matthew AND no_diacritics:<δεκαεσσαρες>)
```

A search with no_diacritics results in:

```
(work:<new-testament> AND section:matthew AND content:<δεκαεσσαρες>)
```
