

TextCritical.net - Feature #1314

Ability to keep notes

05/02/2016 07:46 PM - Luke Murphey

Status:	Closed	Start date:	05/09/2016
Priority:	Normal	Due date:	
Assignee:	Luke Murphey	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	5.0.0		
Description Add the ability to make notes. These notes should be: <ol style="list-style-type: none">1. Shown on the read work page for the work and all related works2. Rendered on a list of notes somewhere3. Exportable / sharable I am thinking these could be stored on Google Drive or another online file storage mechanism. It would be nice if the stored notes were somehow renderable in Google Drive so that they would be useful even when not viewed within the application itself.			
Subtasks:			
Feature # 1334: Add ability to create notes			Closed
Feature # 1335: List notes on the read work page			Closed
Feature # 1336: List notes on related works pages			Closed
Feature # 1337: Notes page which lists notes			Closed
Feature # 1338: Add ability to delete notes			Closed

History

#1 - 05/09/2016 07:06 PM - Luke Murphey

Potential data structure:

- JSON: easy to parse, but not viewable by the user
- Spreadsheet: viewable, but difficult to parse in JS (see <https://developers.google.com/apps-script/guides/sheets>)
- CSV: somewhat parseable, but can be edited & viewed in Google drive natively (once converted)

#2 - 05/09/2016 07:11 PM - Luke Murphey

Data the must be stored:

- Work (slug)
- Reference (text)
- Division ID (text): this would be the descriptor of the division
- Verse ID (text): this would be the descriptor of the verse
- Title (text)
- Note content (text)
- Last edited (date)

I think using CSV makes a lot of sense. That opens the possibility of using other file storage APIs (Box, DropBox, etc).
