See <http://stackoverflow.com/questions/8033552/python-socket-bind-to-any-ip>

#2 - 03/14/2017 04:13 AM - Luke Murphey

Example of a simple server at <http://www.binarytides.com/python-socket-server-code-example/>

#3 - 03/14/2017 04:28 AM - Luke Murphey

- File *listener.py* added

#4 - 03/14/2017 04:44 AM - Luke Murphey

netstat says it is listening on ::

```
TCP      [::]:2121      [::]:0          LISTENING
[python.exe]
```

#5 - 03/14/2017 04:52 AM - Luke Murphey

It looks like the ftp library is using getaddrinfo()

<https://docs.python.org/2/library/socket.html#socket.getaddrinfo>

It appears that the hostname must be used. Listening works when I connect to <ftp://localhost:2121>.

#6 - 03/14/2017 05:21 AM - Luke Murphey

- Status changed from New to Closed
