Target version:	2.5.0		
Description See https://github.com/LukeMurphey/lookup-editor/issues/5 Here are steps to reproduce it: <ol style="list-style-type: none">1. Login as userA2. Create a user-only lookup3. Modify the permissions of the lookup to give everyone read and write permissions and share it with all apps4. Login as userB5. Try to open the lookup; note that it cannot be loaded			

History

#1 - 11/05/2016 04:15 AM - Luke Murphey

The parameters for loading the lookup are:

- owner=admin
- namespace=lookup_editor
- lookup=admin_user_only.csv
- type=csv

#2 - 11/05/2016 04:22 AM - Luke Murphey

The underlying call is:

https://127.0.0.1:8089/servicesNS/admin/lookup_editor/data/lookup-table-files/admin_user_only.csv

It should be:

https://127.0.0.1:8089/servicesNS/nobody/lookup_editor/data/lookup-table-files/admin_user_only.csv

#3 - 11/05/2016 04:48 AM - Luke Murphey

I think I need to check eai:acl[sharing] to see if it is global.
