

Website Input - Bug #1598

Not all values are present: indexing is truncating events

11/18/2016 12:23 AM - Luke Murphey

Status:	Closed	Start date:	11/18/2016
Priority:	Normal	Due date:	
Assignee:	Luke Murphey	% Done:	100%

Target version:	4.0		
Description			
Title is sometimes not present. I'm using a stash file so I don't know why the entire field isn;t available.

Revision 210 - 11/18/2016 10:40 PM - Imurphey

Preventing truncation of events, closes #1598

History

#1 - 11/18/2016 06:28 AM - Luke Murphey

- Subject changed from *Not all values are present* to *Not all values are present: indexing is truncating events*

#2 - 11/18/2016 06:32 AM - Luke Murphey

Currently seeing events of length 4074 using `| eval l=len(_raw)`.

#3 - 11/18/2016 06:33 AM - Luke Murphey

Questions:

1. What is the length of the original event?
2. Is the event getting sent to the stash file correctly?

#4 - 11/18/2016 06:43 AM - Luke Murphey

Stash event is getting created correctly.

#5 - 11/18/2016 06:43 AM - Luke Murphey

Both of the following fields are getting written at the end which is less than ideal:

- raw_match_count
- title

#6 - 11/18/2016 07:16 AM - Luke Murphey

The lengths are not the same which might imply something within the event is the problem. However, when I truncate the stash file by the location where it is cut off, I consistently get files of 4,192 bytes.

#7 - 11/18/2016 07:19 AM - Luke Murphey

If I take out the stash header, I get exactly 4096 bytes or 2e12.

#8 - 11/18/2016 07:34 AM - Luke Murphey

Might need an option to make a new event for each match.

#9 - 11/18/2016 10:40 PM - Anonymous
