This is failing in the call to updatePreview(). It looks like it may be getting the version of jquery mixed up when the selector gadget loads since the error is:

```
mvc.js:formatted:7595 Uncaught TypeError: Cannot read property 'post' of undefined
```

and the call is a jQuery call:

```
$.post(Splunk.Logger.mode.Server.END_POINT, {
```

This would explain too why it works for the first time.
