Revision 57 - 02/08/2017 05:58 AM - lmurphey

Excluding the IP address from the WoL call unless a port is provided

Closes #1733

History

#1 - 02/07/2017 03:42 AM - Luke Murphey

Waking works except when an IP address is provided.

#2 - 02/07/2017 05:37 AM - Luke Murphey

It seems like it works sometimes. I'm wondering if it only works when the computer has been recently asleep (perhaps when the ARP cache is fresh).

#3 - 02/07/2017 05:44 AM - Luke Murphey

This does not work:

```
from network_tools_app.wakeonlan import wol
wol.send_magic_packet("4C:CC:6A:4E:40:30", ip_address="10.0.1.15")
```

This does:

```
from network_tools_app.wakeonlan import wol
wol.send_magic_packet("4C:CC:6A:4E:40:30")
```
