History

#1 - 02/10/2017 08:08 PM - Luke Murphey

I have the dashboard showing the last result. However, it is showing blank fields. These fields don't appear to exist in the original data.

#2 - 02/10/2017 10:25 PM - Luke Murphey

I need some way to show the data like when the command runs (using transpose). Alternatively, I could just show the raw output.

#3 - 02/11/2017 12:13 AM - Luke Murphey

Need to show what host the request was for (perhaps a single value).

#4 - 02/11/2017 12:15 AM - Luke Murphey

Also, need to better detect when a name could not be resolved.

#5 - 02/11/2017 05:51 AM - Anonymous
