

Lookup Editor - Bug #1869

Deleting entries doesn't work on Splunk 6.6

05/21/2017 01:02 AM - Luke Murphey

Status:	Closed	Start date:	05/20/2017
Priority:	Normal	Due date:	
Assignee:	Luke Murphey	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	2.7.0		
Description			
It works, but then generates a 500 error.

This works:

```
curl -k -u admin:changeme -X DELETE https://localhost:8089/servicesNS/nobody/lookup_editor/storage/collections/data/Test/5920ddbb0ffdd530641cd538
```

But calling if from Splunkd doesn't.

#2 - 05/21/2017 01:10 AM - Luke Murphey

Network Tools works but it is using the _raw endpoint:

```
http://127.0.0.1:8000/en-US/splunkd/___raw/servicesNS/nobody/network_tools/storage/collections/data/network_hos
ts/5920e8ed0ffdd59ac371a282
```

#3 - 05/21/2017 04:36 AM - Luke Murphey

kvstore.js seems to do this correctly. I could use this instead.

```
// Destroy model with specific key
var model = new MyModel({ _key: '5447fb752dbbb628d0224132' });
model.destroy()
  .done(function() {
    console.log('Model delete from server');
  });
```

#4 - 05/21/2017 05:34 AM - Luke Murphey

I might want to replace the ajax call with something like this:

```
this.kvStoreModel = KVStore.Model.extend({
  collectionName: this.lookup,
  namespace: {
    'owner' : this.owner
  }
});

var model = new this.kvStoreModel({ _key: _key });
model.destroy()
  .done(function() {
    console.info('KV store entry removal completed for entry ' + _key);
    this.hideWarningMessage();
    this.updateTimeModified();
  })
);
```

#5 - 05/21/2017 05:37 AM - Luke Murphey

To use the KV store model, I should:

1. Have the KVStoreModel initialized on KV store load so that no one else has to reinitialize it.
2. Add the fail handlers for the delete routines.
3. Look for other instances of direct AJAX calls; replace them.
