Website Input - Bug #1877

Input matches in UI but not in preview

Description

I am seeing a case where the UI shows matches but the preview and the search command do not (or vice-versa).

The site http://connect.insteon.com/getinfo.asp shows no matches in the UI for "font>table>tr" but does for "font>table>tbody>tr". Preview only shows matches for "font>table>tr" but does not for "font>table>tbody>tr".

It looks like the actual HTML does not have a tbody. Is this getting added by the browser or the controller? This is getting added by the browser apparently.

#2 - 05/23/2017 07:19 PM - Luke Murphey

See https://stackoverflow.com/questions/938083/why-do-browsers-insert-tbody-element-into-table-elements
