Revision 339 - 07/03/2017 06:17 AM - luke.murphey

Users can no longer monitor non-HTTPS sites on Splunk cloud

Reference #1913

History

#1 - 07/03/2017 02:34 AM - Luke Murphey

- Status changed from New to In Progress

#2 - 07/03/2017 02:35 AM - Luke Murphey

Using field validation for this is difficult since the field doesn't have REST access and neither does the modular input constructor. I'll probably have to sub-class validate_parameters().

#3 - 07/03/2017 02:45 AM - Luke Murphey

1. Change get_validation_data to return the session ID
2. Change do_validation to pass session ID
3. Change validate_parameters to take session ID

#4 - 07/03/2017 05:02 AM - Luke Murphey

Splunk doesn't seem to return the response to modular input validation failures.

I have a print_error function just like it has: <http://docs.splunk.com/Documentation/Splunk/6.6.2/AdvancedDev/ModInputsExample>
