Target version:	4.3.0			

Description

Cloud Vet app [#1818](#) **(Website Input) Version 4.3**

The app Website Input has been updated in version 4.3 to pass cloud certification (https://splunkbase.splunk.com/app/1818/).

The following changes were based on input from APPCERT-2467:

- Passwords use secure storage (both the proxy password entered on the setup page as well as passwords entered on the modular input page)
- The app will not allow connections to HTTP sites if on Cloud (only HTTPS sites are allowed on Cloud)
  - The UI will block saving of inputs with HTTP sites and the input will skip HTTP based inputs (so that configuring a site via a conf file directly will not circumvent UI controls)
- Dependencies were updated. See list here: https://lukemurphey.net/projects/splunk-web-input/wiki/Dependencies
