Observations:

- No tables are created
- Clearing the routers doesn't help
- The database is created but no tables exist]
- Removing the reference to the library and the router didn't help

<https://stackoverflow.com/questions/33086444/django-1-8-migrate-is-not-creating-tables>

```
python manage.py migrate --fake reader zero
python manage.py migrate reader
```

That didn't work.

This had to do with a bad router. Fixed.
