Category:	Input: Web Spider		**Estimated time:**	0.00 hour
Target version:				

Description

Being able to scan multiple URLs allow people to use the app to scan multiple URLs that ought to use the same extraction rules. In this case, spidering may not work because it is possible that no single page contains the URL (such as in the case of a URL constructed in Javascript from something like a dropdown).

Subtasks:

Feature # 2010: Update spec with ability to specify multiple URLs	**New**
Feature # 2011: Update input with ability to use specify multiple URLs	**New**
Feature # 2012: Update mod-input to allow the specification of multiple URLs	**New**
Feature # 2013: Update wizard to allow the specification of multiple URLs	**New**
