Improving workflow for importing work from

Importing a work with overwrite set no longer produces two entries. Reference #2015.

Form no longer generates an error when you import twice in a row. Reference #2014.

History

#1 - 08/23/2017 05:18 AM - Luke Murphey

- Target version set to 1.6

#2 - 08/23/2017 05:02 PM - Luke Murphey

Here is the call stack:

- import_xml_document
 - Calls make_work() which gets the slug
 - Calls delete_equivalent_works if overwrite is set to true
 - Calls self.work.save()

Note that make_work() occurs before delete_equivalent_works()

#3 - 08/23/2017 05:14 PM - Luke Murphey

- Status changed from New to Closed

- % Done changed from 0 to 100
