History

#1 - 08/27/2017 05:20 AM - Luke Murphey

See <https://vuejs.org/v2/guide/single-file-components.html>,
<https://medium.com/js-dojo/7-ways-to-define-a-component-template-in-vuejs-c04e0c72900d>

#2 - 09/04/2017 10:51 PM - Luke Murphey

<http://riotjs.com/>

#3 - 09/05/2017 12:49 AM - Luke Murphey

Possible implementation:

Phase 1:

- About dialog
- Content me dialog
- Wiki dialog
- Work info dialog

Phase 2:

- Content view (could make loading dual works possible)
- Select work dialog

#4 - 09/05/2017 12:50 AM - Luke Murphey

Some fixes needed:

- Need space following the progress bar
- Need to show the title even if there is no section info
- Fix the info dialog

#5 - 09/05/2017 05:05 AM - Luke Murphey

- Target version changed from 1.6 to 2.0

#6 - 09/06/2017 05:24 PM - Luke Murphey

- Reader view
 - Work view
 - Download ebook view
- Search view
 - Search results
 - Search result
- Library view
- About view
- Wiki info lookup view
- Work info lookup view

#7 - 09/07/2017 07:47 AM - Luke Murphey

Questions about riot:

- How do I call a function in the module (like opening a dialog)
- What directory should I put the tags into?
- How do you pass arguments to a riot tag?
 - <https://martinmuzatko.github.io/riot-cheatsheet/#templating-options>
- How do I load riot JS via require
 - Have to make riot global in scope for it to load
 - See also <https://stackoverflow.com/questions/43193538/unable-to-require-tag-on-server-side-in-riot-js>
 - I might be able to do this using this technique:
<https://stackoverflow.com/questions/22210144/how-do-i-export-a-global-variable-from-require-js>
- Can a custom tag be included in another tag in a loop?
 - Can't get riot to load a nested tag
 - Using a mount call within the nesting tag
 - Using a mount call within the main code JS (that loads the nesting tag)
 - <https://codepen.io/marcusstenbeck/pen/aOzoOv>
- How can I pass data from an API call down to a tag via scripting?
 - Can wire up handlers like this: <https://github.com/riot/riot/issues/1001>
- How can I have a tag not render until it has data?
- How do I share code
 - Use mixins: <http://riotjs.com/guide/#mixins>
- How do I use if branches?
 - <https://github.com/riot/examples/tree/gh-pages/if-else-elseif>

#8 - 09/08/2017 05:03 AM - Luke Murphey

Trying to figure out a way to hand results to the searchresults tag.

#9 - 09/12/2017 07:21 AM - Luke Murphey

What I like:

- Components are self-contained

What I don't like:

- The shared code for the observable
- The use of require.js loaded code where the dependency isn't in riot
- ~~The riot tags are all over the place~~
 - These are being loaded from a central location now

What I struggled with:

- Tag not loading
 - Tag was not registered (missing the script for riot/tag)
 - Forgot to include the tag itself
