Getting a 404 to https://textcritical.net/work_image/ad-principem-ineruditum?width=100

#3 - 09/06/2017 05:00 PM - Luke Murphey

Observations:

- Tried without the argument, that failed too.
- Tested locally, it works
- Does the URL exist on the server?
 - It does
- Do other URLs with underscores work?
 - Beta code converter works
- Is the title not the expected value?
 - It's the same as read_work
- Could the server not recognize the URL because it hasn't been restarted?
 - Restarted, didn't help
- Could the dash be the problem?
 - Tried with abdicatus, didn't work
 - https://textcritical.net/work_image/abdicatus?width=100
- What happens if I hard-code the app to 'abdicatus'
 - That worked, along with removing the cache call
 - Its the cache call that is causing the problem

#4 - 09/06/2017 06:05 PM - Luke Murphey

Might want to cache the images in files
