Target version:	3.0		
Description			

History

#1 - 09/18/2017 03:44 AM - Luke Murphey

is_file_name_valid() in the Python code needs to be changed too

#2 - 10/21/2017 06:25 PM - Luke Murphey

- Status changed from New to Rejected

I'm finding that this works.

#3 - 12/13/2017 04:12 PM - Jeff H

- File 1. Create New Lookup with filename has spaces.JPG added

- File 2. Successfully Saved Filename with two Spaces.JPG added

- File 3. Successfully Saved Filename with one Space.JPG added

- File IE Version ScreenShot.JPG added

Noticing this still is not working for our organization. Firefox blocks, IE 11 allows.

Please review attachments as proof of our issue, please reach-out if you have any questions - I would be happy to help.

#4 - 12/14/2017 11:44 PM - Luke Murphey

I think I actually inadvertently fixed this in a different change. I am currently doing a significant re-write of the app for version 3.0 and in the midst of it discovered there were *two* places where input validation was being done and I had only fixed one. My previous attempt at reproducing this only tested one of the code paths.

I'll retest and confirm though.

#5 - 12/16/2017 07:07 AM - Luke Murphey

Tested tonight on Lookup Editor 3.0 and IE 11.726.15063.0. This appears to be working on the 3.0 with the latest fixes.
