<b>Target version:</b>	1.0 (Release)		

#### Description

When I try to scan <http://www.msc247.com> the following error is logged in the event log:

```
Event System: Non-fatal internal error Severity Error Date 08 Sep 2010 10:16:36 BST Notes stack_trace =
"java.lang.IllegalStateException: Not connected com.sun.mail.smtp.SMTPTransport.checkConnected(SMTPTransport.java:1664) at
com.sun.mail.smtp.SMTPTransport.sendMessage(SMTPTransport.java:590) at

net.lukemurphey.nsia.Scanner.doScan(Scanner.java:162) at net.lukemurphey.nsia.Scanner.run(Scanner.java:125)"
[Return to Event Log List]
```

What is strange is that I am scanning 3 other sites with no problems but this one site simply wont scan, you see it trying to start then it just stops.

Any help much appreciated.

#### History

##### #1 - 09/30/2010 12:45 AM - Luke Murphey

Ticket was transferred from <https://threatfactor.com/Support/Ticket/235>.

##### #2 - 09/30/2010 12:47 AM - Luke Murphey

- Target version set to 1.0 (Release)

Problem is that SMTP transport is not connected, likely due to an incorrect email configuration or transient network connection.

This should not be preventing a successful scan even if the configuration is wrong. Therefore, this is considered a bug.

##### #3 - 09/30/2010 12:50 AM - Luke Murphey

Fix implemented in r775.

##### #4 - 10/01/2010 04:04 PM - Luke Murphey

- % Done changed from 0 to 90

##### #5 - 10/01/2010 04:45 PM - Luke Murphey

- *Status changed from New to Closed*
- *% Done changed from 90 to 100*

Tested and confirmed as working
