- Description updated

#2 - 11/07/2017 07:05 PM - Luke Murphey

Needs to handle about 500 servers every 1-5 mins according to <https://answers.splunk.com/answers/551187/feature-request-schedule-speedtest.html>.

Another person asked for 8,000 servers every 5 mins.

This would mean it would need to handle somewhere between 2-8 hosts per second.

#3 - 11/09/2017 06:59 AM - Luke Murphey

Need to sourcetype the logs too.
