<b>Description</b>			
<p>Hello Mr. Murphey,</p> <p>I was really happy to finde a app like this it would solve many of my problems. But I have a problem with your app. I installed it on our splunk server, but I am not able to save any configuration options. Also the internal browser does not work, none of them. And for all these reasons the wen input itself dont work. Because I get every time the same error: Form authentication failed: Connection failed when loading the authentication form, caused by &gt;&gt;&gt;&gt;</p> <p>In the log I find this: Connection failed when loading the authentication form, caused by &lt;httperror_seek_wrapper (urllib2.HTTPError instance) at 0x7f38480bc328 whose wrapped object = &lt;closeable_response at 0x7f3847f8d200 whose fp = &lt;response_seek_wrapper at 0x7f3847f8dfc8 whose wrapped object = &lt;closeable_response at 0x7f3847f8db90 whose fp = &lt;socket._fileobject object at 0x7f3847f86150&gt;&gt;&gt;&gt;&gt;&gt;&gt;"</p>			

### History

**#1 - 01/26/2018 11:39 PM - Luke Murphey**

- Target version changed from 4.5.1 to 4.5.2

**#2 - 01/29/2018 06:52 PM - Luke Murphey**

- Target version deleted (4.5.2)
