Making setup page work even if no default stanza exists

Reference #2228

History

#1 - 03/17/2018 12:06 AM - Luke Murphey

- Status changed from New to In Progress

- % Done changed from 0 to 40

#2 - 03/17/2018 12:09 AM - Luke Murphey

Trying to get Backbone to create the default stanza if it doesn't exist.

1. Loading _new and then saving to _new
 1. Gets an error saying debug is not supported
2. Not loading _new and then saving to _new
 1. Argument "proxy_password" is not supported by this handler.

#3 - 03/19/2018 05:18 AM - Luke Murphey

Questions:

- Where is the "Argument is not supported by this handler." message coming from
 - I don't see anything in the RestHandler base class
 - This is coming before the REST endpoint runs
 - existing stanzas can be edited
- Will setting no properties work?
 - Yes it does
- Is execute being called for the create call?
 - No, it is being skipped somehow

#5 - 03/19/2018 08:01 PM - Luke Murphey

This is weird

The following works:

```
this.website_monitoring_configuration = new WebsiteMonitoringConfiguration({
  user: 'nobody',
  app: 'website_monitoring'
});

this.website_monitoring_configuration.save({}, {
  'url' : '/en-US/splunkd/servicesNS/nobody/website_monitoring/admin/website_monitoring/default'
});
```

This does not:

```
this.website_monitoring_configuration = new WebsiteMonitoringConfiguration({
  user: 'nobody',
  app: 'website_monitoring'
});

this.website_monitoring_configuration.save();
```
