<b>Description</b> Encountering an issue when trying to open any lookup for editing since deploying v3.0.3 on a SHC and using Chrome to access the Lookup Editor. Every time it reports an error "The requested lookup file does not exist".  If I open the same lookup using the Lookup Editor within Internet Explorer, the issue does not appear. We also have the same issue with not being able to use Chrome. This is a problem since it is Chrome that work best with the rest of Splunk UI.
