

Website Monitoring - Bug #2290

Handle cases where user has no access to check if host is on SHC

08/14/2018 07:20 PM - Luke Murphey

Status:	Closed	Start date:	08/14/2018
Priority:	Normal	Due date:	
Assignee:	Luke Murphey	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	2.7.2		
Description If the user doesn't have "list_search_head_clustering" capability then the front-end cannot tell if the host is running on SHC. Currently, the UI will block since it gets a 403 response from the endpoint. I need to figure out how to handle this. Not being able to tell if the SH is using SHC means that allowing a user to make an input will allow them to make an input that won't replicate.

- Description updated

#2 - 11/08/2018 11:49 PM - Luke Murphey

I wonder if I can assume that the user shouldn't have the capability on SHC.
