History

#1 - 08/28/2019 08:59 PM - Luke Murphey

A couple of options:

1. Implement as a new option in the input
2. Implement as a lookup file

#2 - 08/31/2019 05:55 PM - Luke Murphey

- Assignee set to Luke Murphey
- Target version set to 2.8

#3 - 09/18/2019 05:55 PM - Luke Murphey

<https://github.com/LukeMurphey/splunk-website-monitoring/issues/33>

#4 - 09/26/2019 09:41 PM - Luke Murphey

Below is what needs to be updated.

To get alerting to work:

1. Modular input: to accept threshold
2. Modular input admin page: to accept threshold value
3. Alert search "Website Performance Problem": to fire on thresholds
 1. Perhaps a new macro `response_time_threshold(threshold)`

To improve rendering the

1. WebsiteStatusCellRenderer.js:
 1. Might need to make a special field for rendering the status
2. Execute summary dashboard: to put sites into the slow category if they take too long

#5 - 09/27/2019 01:15 AM - Luke Murphey

- *Status changed from New to Closed*
- *% Done changed from 0 to 100*
