RADIUS Authentication - Bug #2314

Build script support for running Docker images isn't great

11/03/2018 06:29 AM - Luke Murphey

Status:	Closed		**Start date:**	11/03/2018

Target version:	1.4.0			

Description

Currently, there isn't a great way to execute the events to start and stop docker. The two paths are:

- Attach the events to the test.run_unit target. This doesn't work because Ant doesn't support firing events *after* a target has run
- Attach the events to test.deploy_and_run_unit. This works except for when people run test.run_unit directly.
