

## TextCritical.net - Feature #2329

Feature # 2356 (New): Improved rendering of lexicons

### Descriptors ought not require the division parent for lexicon (just the word form)

11/20/2018 08:49 PM - Luke Murphey

<b>Status:</b>	New	<b>Start date:</b>	11/20/2018
<b>Priority:</b>	Normal	<b>Due date:</b>

<b>Target version:</b>	Plus_3		
<b>Description</b>			

#### History

##### #1 - 11/20/2018 09:00 PM - Luke Murphey

Questions:

1. How are divisions looked up?
  1. get\_division will not allow a lookup with only the word since it requires that the parent be null
2. How are division references created in the view?
  1. They come out of get\_division\_indicators()
  2. I could have the importer drop the parent divisions but that means that TOC won't work

##### #2 - 11/20/2018 09:19 PM - Luke Murphey

Options:

1. Have the importer drop the parent divisions
  1. Means that TOC won't work
2. Have different functionality for a document of type lexicon
  1. Could have it:
    1. Include a verse lookup tool that auto-fills
    2. Render links only using the leaf division
    3. Allow lookups using only the leaf division

##### #3 - 11/24/2018 07:42 PM - Luke Murphey

Could produce an index with:

- Word form
- Verse (Foreign Key)
- Work (so that we can display which work it is for)

Would need to make a transform to build this.

**#4 - 12/26/2018 03:23 AM - Luke Murphey**

- *Parent task changed from #551 to #2356*

**#5 - 12/30/2018 02:10 AM - Luke Murphey**

- *Target version changed from 3.0 to 3.1*

**#6 - 06/11/2019 02:03 AM - Luke Murphey**

- *Target version changed from 3.1 to Plus\_3*
