Target version:			
Description			
<p>[failure] Check for Module System web.conf endpoints. The Module system was deprecated in Splunk 6.3 as part of the advanced XML deprecation. See: http://docs.splunk.com/Documentation/Splunk/latest/Module</p> <p>[failure] Check that apps only expose web endpoints that are defined by the Splunk App within restmap.conf. Each web.conf [expose:] stanza should have the property pattern= which defines a url pattern to expose. Each url pattern exposed should correspond to a stanza within restmap.conf with a url pattern defined with the match= property, or for the case of [admin:] stanzas a combination of match= and members= properties.</p> <p>web.conf found with a `pattern` exposed that does not correspond to any `match` stanza in restmap.conf. Apps should only expose endpoints that they define. Pattern: `/admin/network_tools/default/`. Please remove or edit this stanza: [expose:network_tools_app_config]. File: default/web.conf, Line: 5. File: default/web.conf Line Number: 5</p> <p>web.conf found with a `pattern` exposed that does not correspond to any `match` stanza in restmap.conf. Apps should only expose endpoints that they define. Pattern: `/data/inputs/ping/`. Please remove or edit this stanza: [expose:network_tools_ping_input]. File: default/web.conf, Line: 9. File: default/web.conf Line Number: 9</p> <p>[failure] Check that all capture groups are used in transforms.conf. Groups not used for capturing should use the non-capture group syntax</p> <p>The following stanza contains `FORMAT` property that does not match its `REGEX` property, missing: ['\$1']. Stanza: [sinkhole_stash_output_header] REGEX: <splunk_appinspect.configuration_file.ConfigurationSetting object at 0x7f394158c310> FORMAT: \$2. If you don't want to capture any group in your regexp, please use a non-capturing expression. See http://docs.splunk.com/Documentation/Splunk/latest/Knowledge/AboutSplunkregularexpressions#Non-capturing_group_matching for details. File: default/transforms.conf, Line: 6. File: default/transforms.conf Line Number: 6</p> <p>The following stanza contains `FORMAT` property that does not match its `REGEX` property, missing: ['\$1']. Stanza: [kv-extraction-for-pings-nix] REGEX: <splunk_appinspect.configuration_file.ConfigurationSetting object at 0x7f3941084610> FORMAT: rtt::\$2. If you don't want to capture any group in your regexp, please use a non-capturing expression. See http://docs.splunk.com/Documentation/Splunk/latest/Knowledge/AboutSplunkregularexpressions#Non-capturing_group_matching for details. File: default/transforms.conf, Line: 27. File: default/transforms.conf Line Number: 27</p>
