Description

History

#1 - 08/27/2019 04:45 PM - Luke Murphey

Getting a 404 on get_lookup_contents and get_lookup_backups_list.

#2 - 08/27/2019 05:26 PM - Luke Murphey

Questions:

- What other apps are installed?
- Does Splunk see the REST endpoint as registered?
- Are there errors in the _internal index?
- Are there log entries from the REST endpoints?
- Can the REST endpoints be seen in Splunkd?

Observations:

- The user had the TA-builder installed
- The request is being made to /en-US/custom/lookup_editor/lookup_edit/get_lookup_contents which is the old controller code. The front-end code is being cached.

#3 - 08/27/2019 05:26 PM - Luke Murphey

- *Subject changed from 404 is recived when attempting to view a lookup to 404 is received when attempting to view a lookup*

#4 - 08/27/2019 05:40 PM - Luke Murphey
