<b>Description</b>			

History

#1 - 12/02/2019 11:45 PM - Luke Murphey

Questions:

- Are the file contents in JS correct?

Observations:

- The base64 code is indeed JSON converted to a string
- get\_forms\_args\_as\_dict() sees the content as JSON-stringified
- The data in the request is also a string converted incorrectly

Possible causes:

- JS is base64 encoding:
  - encoding in the same way
- parse\_in\_string()
- convert\_to\_dict()

#2 - 12/03/2019 07:14 PM - Luke Murphey

- Status changed from New to Closed
- % Done changed from 0 to 100
