Questions:

- What does the XML look like?
- How does Perseus handle this?
    - Here it is: http://www.perseus.tufts.edu/hopper/text?doc=J.+AJ+13.7.1&fromdoc=Perseus%3Atext%3A1999.01.0146
    - There are multiple instances of chapter 7
- What order ought these to be in? Are the division markers wrong?

Observations:

- I wonder if I should have the importer check for an existing chapter and set a different division ID
    - make_division
- Should I implement this as a post-action?
