Reference #2558

History

#1 - 12/31/2019 07:50 AM - Luke Murphey

Obs:

- This works on my local host.
- This doesn't work even when proxying via SSH
- The version number is missing on the admin page

Qs:

- What does w3m see when browsing locally?
 - Nothing
- What does Firefox see when browsing locally?
 - Doesn't work
- Is the localhost on a different range?
 - Server: 172.17.0.3
- Are there any error messages?

- Does the session table exist?

Possible Fixes:

- The django IP filter setting is preventing it from working
- The context processor is failing
- Run migration
 - `python manage.py migrate --database=default`
 - Remade superuser, this worked

#2 - 12/31/2019 06:37 PM - Luke Murphey

I updated the build and now it doesn't work locally.
