

Website Monitoring - Bug #2588

appinspect failures

01/16/2020 06:16 PM - Luke Murphey

Status:	New	Start date:	01/16/2020
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
<p>FAILURE: web.conf found with a `pattern` exposed that does not correspond to any `match` stanza in restmap.conf. Apps should only expose endpoints that they define. Pattern: `/admin/macros/response_codes_to_alert_on*`. Please remove/edit this stanza: [expose:website_monitoring_response_codes_macro]. File: default/web.conf</p> <p>FAILURE: web.conf found with a `pattern` exposed that does not correspond to any `match` stanza in restmap.conf. Apps should only expose endpoints that they define. Pattern: `/admin/macros/response_time_threshold*`. Please remove/edit this stanza: [expose:website_monitoring_response_time_macro]. File: default/web.conf</p> <p>FAILURE: web.conf found with a `pattern` exposed that does not correspond to any `match` stanza in restmap.conf. Apps should only expose endpoints that they define. Pattern: `/admin/website_monitoring/*`. Please remove/edit this stanza: [expose:website_monitoring]. File: default/web.conf</p>			

History

#1 - 01/16/2020 07:24 PM - Luke Murphey

Questions:

- What happens when I remove the web.conf entries
- Do other apps need to do the same thing?
- Are there alternative endpoints what would work?
 - For macros, yes
 - For inputs, no
- What are the failures?
 - [expose:website_monitoring] in web.conf
 - appserver/modules
 - authorize.conf

Os: *

Solutions:

- I could write a REST endpoint for passing requests to the input endpoint
