

Lookup Editor - Task #2634

Task # 2620 (Closed): Replace HandsOnTable with jexcel

Run through test plan

04/03/2020 05:45 AM - Luke Murphey

Status:	Closed	Start date:	04/03/2020
Priority:	Normal	Due date:	
Assignee:	Luke Murphey	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	3.4		
Description			
Might need to add note about _time field handling			

History

#1 - 04/13/2020 04:04 AM - Luke Murphey

Here are the parts of the text plan that should be focused on:

Users can edit lookups

```
[Automated] The files can be modified in the editor (both KV store and CSV)
  New empty rows can be edited (in both KV store and CSV lookups)
  Lookups entries can be loaded from other users (KV store only)
  Entries are saved in the user selected
  Entries from a given user are displayed
  The URL is modified when switching user contexts
  Rows are deleted under the loaded user
Adding a new row works and doesn't show "null"
[Automated] The user is provided messaging regarding saving edits (that it is in-progress and/or completed)
)
[Automated] KV store with a hierarchy can be edited
[Automated] KV store that enforces types can be edited (and a warning is shown if an incorrect types)
  [Automated] Incorrect values for fields when a lookup has defined types can be edited
  Making multiple KV store lookups with the same name is not allowed
  A warning is shown if the user does not have permission to view the lookup files
  A warning is shown if the lookup file does not exist
[Automated] A warning is shown if the lookup file is too large to modify
Users cannot remove the header
  Lookup files that are owned by a user but are actually in the apps directory are saved in the correct location
  The lookup backup list is refreshed when saving (CSV only)

[Automated] The editor recognizes the field types (if available) for KV lookups and shows that the value is in correct (e.g. entering "foo" in a field that expects an number is shown as invalid)
  Header is fixed so that it always appears at the top of the editor
  If a lookup has no rows, then the editor will display at least one empty row
  A warning is displayed if attempting to remove the first row (CSV lookups only)
  KV collection time fields can be edited and converted accordingly
  Entering a epoch time gets converted to the appropriate string value
  Entering a string value gets converted to the appropriate epoch value
  Values are loaded upon page load correctly
```

Users can view and load backups of files (CSV only)

Backups are automatically made when a lookup is saved

- Loading a backup causes it to be loaded into the editor*
A message is shown when a lookup is loaded
Backups for user lookups work

XSS prevention

An imported CSV with scripting doesn't get executed

```
[Automated] A CSV or KV store lookup with scripting doesn't get executed
```
