Qs:

- Params:
  - style
  - onload
  - updateTable

Obs:

- Neither getValue() not setValue() doesn't get called upon render
- example of using a custom formatting: <https://jsfiddle.net/paulhodel/5n21ep6s/>
- onchange doesn't get called when rendering the table
- example of some sort of table rendering: <https://bossanova.uk/jexcel/v2/examples/table-styling>
  - This doesn't work

Solns:

- **[No Go]** patch getValue() and setValue()
  - <https://bossanova.uk/jsuites/javascript-calendar>
  - This never fires
- Convert values on save
  - This works but doesn't convert the values on load
- Convert on the backend
  - Would work, but ugly
- Custom datetime editor
  - Would work but not for the table load

- **[No Go]** Custom renderer hook
  - <https://bossanova.uk/jexcel/v2/examples/table-styling>
