Not quite sure how to implement this.

Solns:

- Have a ping to check for a 503 in the App
- Have a hook which grabs any 503 while using the app
- Have a ping check before loading the app to verify it is online
- Create a separate 503 page
- Detect this in the URL somehow (and have the server send the user to it)

#3 - 05/08/2020 05:59 AM - Luke Murphey

- Priority changed from Urgent to Normal

#4 - 05/11/2020 04:02 AM - Luke Murphey

- Status changed from New to In Progress

#5 - 05/11/2020 04:38 AM - Luke Murphey

This mostly works. I just don't know how to get the page to reload.
