Qs: *

Obs:

- I would need to figure out how to deploy the SPA

Solns:

- Bundle directly into app
 - This is easy but requires pushing an update to the backend every time I want frontend updates
- Keep separate, use backend only for REST endpoints
 - Could deploy frontend easily by just copying out the frontend code to the web-server
 - Would need to map APIs in the web-server
 - Backend would not need to be upgraded for a new UI
 - Perhaps I could get rid of the static directory population script for the SPA code

#2 - 05/18/2020 05:30 PM - Luke Murphey

- Status changed from New to In Progress

#3 - 05/19/2020 05:42 AM - Luke Murphey

- Status changed from In Progress to Closed

- % Done changed from 0 to 100
