

TextCritical.net - Bug #2714

Notes with encapsulated HTML don't render correctly

05/04/2020 05:42 PM - Luke Murphey

| Target version: | | | |
| Description | | | |
| See the preface note for Antiquities of the Jews. It appears like this: | | | |
| <pre>PrefaceThis preface of Josephus is excellent in its kind, and highly worthy the repeated perusal o f the reader, before he set about the perusal of the work itself.</pre> | | | |
| This could be improved by putting each text chunk from separate HTML nodes on a new line. | | | |

#4 - 05/11/2020 12:33 AM - Luke Murphey

The notes now extract into multiple lines. However, the line sometimes broken when they shouldn't be (like with spans).

Qs: *

Obs: *

Solns:

- Attach note type (span, etc.)
 - I could attach the ID too if I wanted
- I could combine lines if they are for spans and separate if they are divs
- I could process the HTML into some sort of structure
- Re-import the work such that the importer doesn't overlap the notes
- I could have this extract two icons instead
 - The following CSS is hiding it:

```
<span class="label note hide" id="content_for_2101a2ea">Preface<i class="icon-info-sign icon-white note
-tag" id="95194d2d"></i>
<span class="label note hide" id="content_for_95194d2d">This
preface of Josephus is excellent in its kind, and highly worthy the
repeated perusal of the reader, before he set about the perusal of the
work itself.</span>
</span>
```

- I would need to have this only grab the text from topmost node, not the containing nodes
