See Antiquities of the Jews

The template (https://github.com/LukeMurphey/textcritical_net/blob/master/src/reader/templates/read_work.html)

Obs:

- I am using the stringified version of the name

```
{% if divisions and divisions|length > 1 %}
<div class="table-of-contents">
  <input autocorrect="off" autocapitalize="off" type="text" placeholder="Filter table of contents..." class="division-filter" />
  <ul class="nav nav-list">
    {% for division_part in divisions.all %}
      {% if chapter.parent_division.id == division_part.id %}
      <li class="division-{{division_part.level}} active">
        <a data-division-descriptor="{{division_part.descriptor}}" href="{% url "read_work" work.title_slug %}/{{ division_part.get_division_indicators|join:"/" }}"><i class="icon-book icon-white"></i>{{division_part|capfirst}}</a>
      </li>
      {% else %}
      <li class="division-{{division_part.level}}">
        <a data-division-descriptor="{{division_part.descriptor}}" href="{% url "read_work" work.title_slug %}/{{ division_part.get_division_indicators|join:"/" }}"><i class="icon-book {% if USE_DARK_THEME|default_if_none:1 %}icon-white{% endif %}"></i>{{division_part|capfirst}}</a>
      </li>
      {% endif %}
    {% endfor %}
  </ul>
</div>
{% endif %}
```

```
{{chapter.get_division_description_titles.title|replace:"βook,Book"}}
```
