

ThreatFactor NSIA - Bug #275

Service Does Not Start on Windows 2008 R2

11/27/2010 03:38 AM - Luke Murphey

Status:	Closed	Start date:	11/27/2010
Priority:	Normal	Due date:	11/29/2010
Assignee:	Luke Murphey	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	1.0.1		
Description			
The NSIA service does not start correctly on Windows 2008 R2. The problem appears to be that Java is not added to the path on Windows 2008.			

History

#1 - 11/27/2010 04:14 AM - Luke Murphey

<http://stackoverflow.com/questions/3038140> includes code to help find the Java path but no such registry key exists on Windows 2008 R2.

#2 - 11/27/2010 04:17 AM - Luke Murphey

Java seems to install in C:\Windows\System32 by default:

<http://social.msdn.microsoft.com/Forums/en-US/Vsexpressvb/thread/01a425a0-51a5-49f3-b52f-23b20005f028/>

#3 - 11/27/2010 04:24 AM - Luke Murphey

The system32 directory is under echo windir\system32 (http://en.wikipedia.org/wiki/Special_Folders) and can be accessed with:

```
Environment.GetFolderPath(Environment.SpecialFolder.System)
```

(<http://www.dotnetspider.com/forum/62278-function-get-system-folder.aspx>)

More information about how Java paths are structured: <http://javahowto.blogspot.com/2006/05/javahome-vs-javahome.html>

#6 - 11/28/2010 02:05 AM - Luke Murphey

Added auto-detection of the Java executable. Also, added the ability to specify the Java interpreter on the command-line by defining JVM.Executable in config.ini.

#7 - 11/28/2010 02:10 AM - Luke Murphey

Need to add a note to the documentation about how to start NSIA on Windows server since Java is not loaded in the path, registry or in an environment variable.
