Obs:

- A basic dialog kinda looks like what I want

Qs:

- Does SUI have a fullscreen option?
  - Yeah, but it doesn't fill the screen

Solns:

- Add support for the popup dialog to fill
  - Like this one: https://material-ui.com/components/dialogs/ which has an option for fullscreen
  - I can get this to kinda work. However, neither fixed nor absolute positioning prevents it from scrolling

    - ███████████████████
      ```
      width: 100%;
      /* max-height: 300px; */
      overflow-y: auto;
      padding: 0px;
      top: 0;
      left: 0;
      height: 100vh;
      ```

- Use the basic dialog
  - https://stackoverflow.com/questions/46016280/how-to-enable-the-react-semantic-ui-modal-to-stretch-across-the-full-screen
- Have the view show an entirely custom dialog and have code the can render the content as a modal when the viewport gets too small

#2 - 05/29/2020 03:13 AM - Luke Murphey

View is blowing up for some reason.

Obs:

- Lots of people get it when the import/export it incorrectly
    - https://github.com/facebook/react/issues/9249

Qs:

- What argument is the one that is causing the problem?
    - onClickBack
    - title

Fixed: I was using the style object like in styled components

#3 - 05/29/2020 06:17 PM - Luke Murphey

- Status changed from New to Closed

- % Done changed from 0 to 100
