Qs:

- How do I make loadChapter work with multiple works?
    - What can I move down into Chapter?
        - data
        - loading
- Where is the logic to show the
- **From Reader** Where should I fetch the data?
    - I thought I should fetch it in the Chapter but this means I need to have the do callbacks to provide the data back to the caller for things like next and prior chapters. *

Obs:

- I would need an additional chapter reference
    - Would need a second data section

Solns:

- Popups don't recognize multiple versus
- loadChapter() doesn't recognize other works
