

Lookup Editor - Bug #2805

Import doesn't import everything

06/30/2020 07:25 PM - Luke Murphey

Status:	Closed	Start date:	06/30/2020
Priority:	Normal	Due date:

Qs:

- What is a minimal repro?
 1. Remove columns until there are fewer column than the import file
 2. Import the file: note that the columns off of the edge are not created
- Is column data stored somewhere?
 - <https://bossanova.uk/jexcel/v3/docs/programmatically-changes>
- Can I add the columns first?
 - No, they don't get added
- How is field_types setup?
- Are there options that I could remove that would make this work?

Obs:

- It appears that jexcel is not increasing the number of columns
- The columns have to exist when the lookup is loaded in order to get them imported
- setConfig() used to exist on older versions
 - <https://bossanova.uk/jexcel/v2/docs/quick-reference>
- <https://github.com/paulhodel/jexcel/issues/806>
- I'm not getting the error on destroy but on the creation of jexcel
- <https://github.com/paulhodel/jexcel/issues/796>

Solns:

- Can I just recreate the jexcel editor on import?
 - I keep getting an error
- Destroy and recreate the jexcel editor
 - `jexcel.destroy(this.$el0, true);`
 - `$(this.$el0).jexcel("destroy", true);`
 - Works but error happens afterwards when recreating
 - `this.jexcel.destroy();`
 - function doesn't exist
- **[Nope]** Add/remove the columns and then import the data
- **[Nope]** Just call setData()
 - <https://github.com/paulhodel/jexcel/issues/498>
 - That is what I was doing, definitely doesn't work
 - Needs the column data added
- **[Nope]** Set columns
 - don't see anywhere this is possible
- use `csvHeaders:true`
