<b>Target version:</b>	4.4.0		
<b>Description</b>			

#### History

##### #1 - 07/09/2020 05:34 AM - Luke Murphey

- Target version changed from *Plus\_2* to *Plus\_1*

##### #2 - 07/10/2020 09:50 PM - Luke Murphey

This works with the exception of when no verse is selected. In that case, it reloads the page. Once it does this though, it seems to work.

Obs:

- When the verse opens, it seems to screw up the loaded works too (and loads both as the second work)
- This works fine when only a single work is open
- This also works fine with the original work; its just the second that has the problem
- onVerseClick() uses the href to route. Somehow, I need this to route to the original work though.

Qs:

- How does backend make those links?

Solns:

- Have backend return content with the relative path (descriptor)
- Parse HTML and make a new href; then fire that \*\*

##### #3 - 07/10/2020 09:50 PM - Luke Murphey

- Target version changed from *Plus\_1* to *4.4.0*

##### #4 - 07/11/2020 12:49 AM - Luke Murphey

- Status changed from *New* to *Closed*

- % Done changed from *0* to *100*
